Allowable Subject Matter

Claims 1 – 18 are allowed. The following is a statement of reasons for such an indication.

The prior art of record fail to teach operating a vehicle drive-by-wire system, comprising, among other limitations, *a communication control unit* coupled to a wireline communication link and a wireless communication link – the unit configured to identify a failure of the wireline link to transmit an actuator command and further *configured to redirect the command over the wireless link*; an actuator coupled to the wireline communication link and the wireless communication link – the actuator configured to receive the command from the wireless link unless the failure of the wireless communication link to transmit the actuator command exists by initiating and implementing a failsafe strategy.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zeitler (US 6,721,638 B2) and Lasky et al. (US 6,772,062 B2) both teach automatic vehicle guidance but fail to teach the above limitations as claimed.
